# INTRODUCTORY

Imitation wood carvings illustrated in this catalog are manufactured in composition and wood fibre materials.

The illusrations shown in this book do not cover our complete line, as we have a staff of designers and carvers making new patterns continually, and should you not find the exact ornaments to cover your requirements, please communicate with us and we will gladly submit special designs to you.

We wish to emphasize the point that we specialize in making exact reproductions of special wood carvings and special designs submitted to us and therefore can very advantageously serve Architects and Designers with their special requirements.

Composition carvings and wood fibre carvings are not materials that are in an experimental stage, have been manufactured by our company for more than thirty-five years and are very well known to the trade in general and are extensively used in connection with high grade furniture, cabinet work and architectural woodwork of any kind.

An exceedingly advantageous feature of our material is the adaptability of the carvings to curved and irregular surfaces.

The carvings can be finished up with the balance of the woodwork, as the same will take the stain and filler just like the woodwork, making a perfect match.

A trial order will convince you that although our product is inexpensive, it is absolutely reliable and durable, and guaranteed against any defects.

## INSTRUCTIONS

When ordering, please specify the color desired, whether for Oak, Mahogany, Walnut or Enamel woodwork. Also specify date of delivery desired. Average orders can be shipped within seven days. All shipments are forwarded by express, unless otherwise specified.

## INSTRUCTIONS FOR MOUNTING COMPOSITION ORNAMENTS

Composition carvings should be applied to the raw wood before they have received any filler or finishing coat. To obtain the best results when applying the ornaments, they should be steamed slightly when mounting. This steaming is done by stretching a piece of canvas or muslin across a steam pot, coating this canvas with a coat of thin glue sizing, and placing the ornaments thereon for a short instant, when the ornaments will become soft and pliable and can then be mounted direct to the raw wood by pressing them firmly with the fingers. It is not necessary to add additional glue to the backs of the ornaments with a brush, neither is any nailing necessary.

## WOOD FIBRE CARVINGS

All patterns shown in this catalog can be supplied in wood fibre when desired. Wood fibre carvings can be carried in stock indefinitely. These carvings can be nailed or glued to the woodwork, either before or after finishing.

For prices on wood fibre carvings, add 50 per cent to prices of composition carvings.
